

GW GEARWRENCH®

Torque for the tightest spots!

120XP

Our new 120XP™ Micrometer Torque Wrenches deliver 120 positions for a 3° swing arc and have a flattened low-clearance beam for reaching fasteners other ratcheting torque wrenches can't. A midpoint-marked knurled aluminum grip with flared ends puts your hand in perfect position for precise control. Available in 1/4", 3/8" and 1/2" drive sizes with accuracy of +/-3%.

They're the best micrometer torque wrenches we've ever made.

Injection-molded case with custom foam insert and removable lid

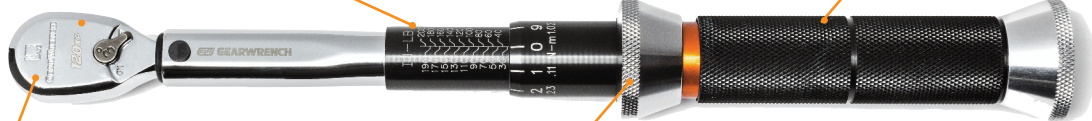

Micrometer Torque Wrenches

High definition scale markings are easier to read

Knurled aluminum grip, midpoint marked for accuracy

Dual Scales, Metric and SA

Double-stacked pawls engage a 60-tooth gear providing exceptional strength, exceeding ASME specifications

Pull back locking collar

Injection molded cases with removable lits for convenient storage
